

CASH FLOW INTELLIGENCE, EMBEDDED IN YOUR STACK

Cash flow decisioning for Provenir-powered banks

Built by lenders, embedded in Provenir.
More origination and less credit risk for banks. No rip-and-replace.

The bureau tells you who a borrower was. Prestatech reads live bank-account data to tell you who they are today, and what's likely to happen next. More confidence, plus the ability to spot viable new deals in real time and catch trouble before it gets painful.

THE INTELLIGENCE LAYER

Live data, turned into credit decisions

Cash flow-enriched credit models

Real-time cash flow based score, DSCR and affordability from live transactions, not last year's revenue.

Portfolio-wide monitoring

Exposure tracking on live data with early-warning, covenant and sanction screening.

Pre-integration into Provenir APIs

API in, decisions out: no rip-and-replace of your existing stack.

Time back to underwriters

Minutes, not days. Automated statement review.

See what the bureau can't

50+ risk signals only transactions reveal.

Audit-ready from day one

KYC/AML and explainable scoring.

Yes to more borrowers

Thin-file and underbanked? Approved with confidence.

Send us 20–30 recent declines.

See who you missed, free, in under a week.

BUILT BY LENDERS, FOR LENDERS

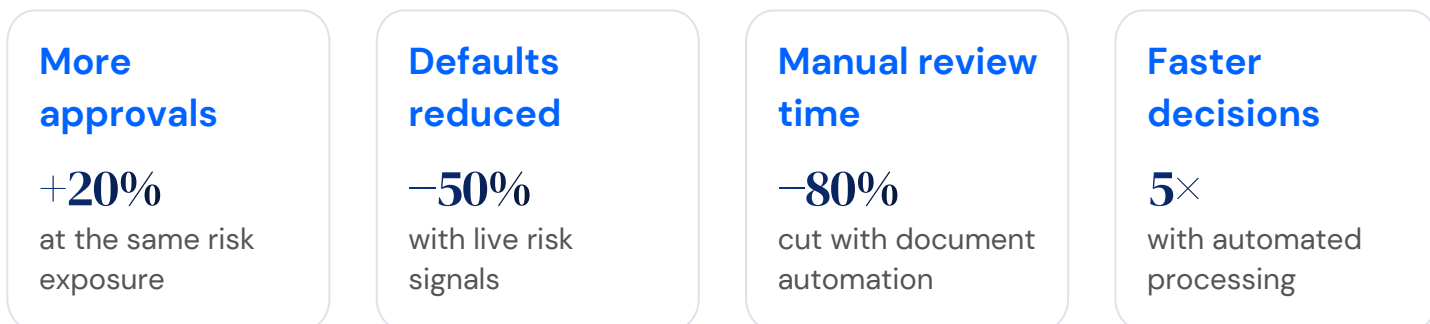

We solved our own underwriting problem first

Prestatech grew out of Prestacap, one of Europe's first digital SMB lenders, acquired in 2020 by Bain Capital and Advent International. We built this technology to fix our own underwriting, then brought it to banks facing the same challenge every day. Battle-tested through a full credit cycle.

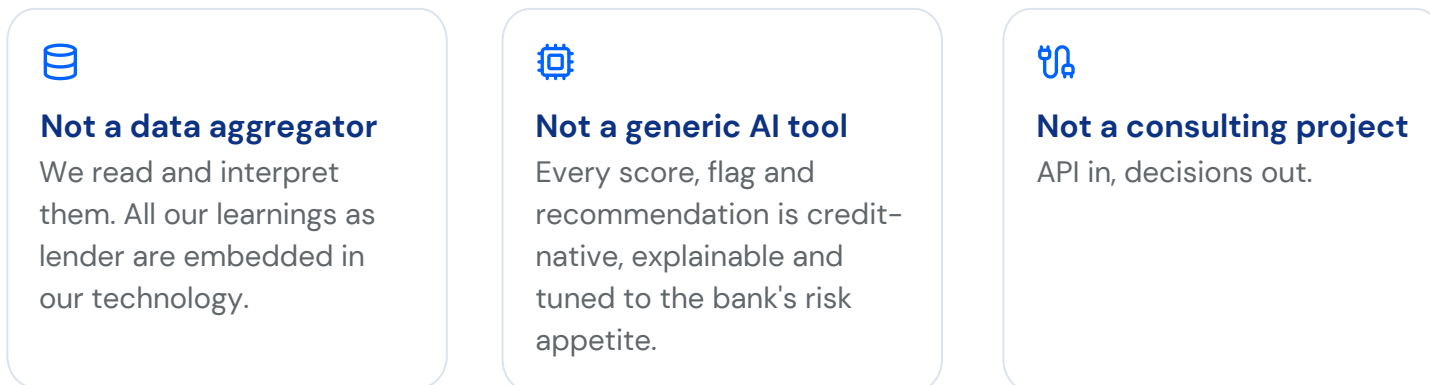

50+ RISK SIGNALS, ONE DECISION

THE NUMBERS THAT MATTER

WHAT MAKES US DIFFERENT

A cash flow analytics and document automation platform, headquartered in Berlin. ISO 27001 & SOC 2 Type II compliant. Now serving banks across the US, LATAM, Europe and the UK.
